Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/577,069

Applicant(s)

HATA ET AL.

Examiner

JULIA SLUTSKER

Art Unit

2891

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 April 2006 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SI/88)
Paper No(s)/Mail Date 10/13/2006/04/24/2006
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the functional layer (22), substrate (21) and conductive substrate (23) must be shown or the features canceled from the claim 5. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. The claims 1 and 5 are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 7 recite the limitation "2" in line 2. There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(c) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Mori'731 (JP 6-349731).

Regarding claim 1, Mori discloses epitaxially growing a compound semiconductor functional layer (Fig.4a, numerals 21, 32,6,3, on a substrate (Fig.4a, numeral 4); bonding a support substrate (Fig.4c, numeral 41) to the compound semiconductor layer (paragraph [0058]); polishing the substrate and a part of the compound functional semiconductor layer on the side which is in contact with the substrate, to remove them (Fig.4c; paragraph [0058]); bonding a thermally conductive substrate (Fig.4D, numeral 1, paragraph [0059]) having a thermal conductivity higher than that of substrate (4) (note: substrate (4) is InP, [0054], and substrate (1) is Si) to the exposed surface of the compound semiconductor functional layer (3) to obtain a multilayer substrate and separating the support substrate (41) from the multilayer substrate (Fig.4e, [0060]).

Regarding claim 2, Mori discloses that the compound semiconductor functions layer includes at least two layers (Fig.4a, 21, 32, 6, 3).

Regarding claim 3, Mori discloses that the compound semiconductor functional layer includes at least one selected form the group consisting of In, Ga and at least one selected form the group consisting of N and As [0054]).

Regarding claim 4, Mori discloses that the thermally conductive substrate includes Si ([0059])

7. Claims 5-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Sano'676.

Regarding claim 5, Sano discloses a method for manufacturing a compound semiconductor substrate, comprising the steps of: epitaxially growing a compound semiconductor functional layer (column 19, lines 40-45; Fig. 1a, numeral 2) on a substrate (Fig. 1a, numeral 1), bonding a thermally conductive substrate (Fig. 2a, numeral 11) having a thermal conductivity higher than that of the substrate (1) (note: (1) is sapphire, column 19, lines 42-45; (11) is AlN, column 24, lines 21-25); polishing the substrate (1) and a part on the compound semiconductor functional layer (2) on the side which is in contact with substrate (1) to remove them (Fig. 2C, column 25, lines 14-20) .

Regarding claim 6, Sano discloses that the compound semiconductor functional layer (2) includes at least two layers (column 20, lines 24-30).

Regarding claim 7, Sano discloses that the compound semiconductor functional layer includes at least one selected from the group consisting of Ga and Al (column 20, lines 25-30) and at least one selected from the group consisting of N (column 20, lines 50-53).

Regarding claim 8, Sano discloses that the thermally conductive substrate includes at least one selected from the group consisting of Al, Cu, Mo, W, diamond, SiC, AlN and Si (column 24, lines 23-26).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Mori.

Regarding claim 9, Mori discloses all limitations of claim 1 for reasons above. Mori appears not explicitly disclose a step of forming an electrode on the resultant compound semiconductor device. However, it would have been obvious to one of ordinary skill in the art at time the invention was made to form an electrode on the resultant compound semiconductor devices for the purpose of using this structure as a light emitting diode.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JULIA SLUTSKER whose telephone number is (571)270-3849. The examiner can normally be reached on Monday-Friday, 8 a.m.-5 p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Baumeister can be reached on (571)-272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

JS

/BRADLEY W BAUMEISTER/
Supervisory Patent Examiner, Art Unit 2891
